

DANIEL DESPOSORIO VICENTE

BACHELOR'S DEGREE IN BIOLOGY

(+51) 991 297 798

daniel982726@gmail.com

Lima, Perú

ABOUT ME

Biology graduate from Universidad Nacional Federico Villarreal (UNFV), with an interest in microbial genomics and gene expression in cancer. Focused on the study of genetic mechanisms involved in antimicrobial resistance and the regulation of genes associated with cancer development and progression.

EDUCATION

UNIVERSITY STUDIES

2019- 2023 | BIOLOGY

Universidad Nacional Federico Villareal

COMPLEMENTARY STUDIES

COURSES

- Introduction to Synthetic Biology: 16 hours
- Introduction to Molecular Biology – Nucleic Acid Extraction, Conventional PCR, and Electrophoresis: 10 hours
- Urine Culture Course, ECOSALUD Medical Center: 10 hours
- Automated Systems for Nucleic Acid Purification and Quality Control in Molecular Biology and Sequencing: 17 hours
- Bioinformatics Workshop – Exploring Galaxy Servers

CERTIFIED FORMAL TRAINING:

- National Institute of Neoplastic Diseases: External rotation in the Molecular Biology Laboratory – 1 month / 2024
- National Institute of Health: Scientific internship in the Clinical Bacteriology In-Hospital Infections Laboratory – 5 months / 2024–2025

PARTICIPATION IN SCIENTIFIC EVENTS

ATTENDANCE:

- VII International Seminar on Genomics - Lima, Peru
- International Forum: Multidisciplinarity, Citizenship, and Scientific Integrity-Lima, Peru
- III Conference on Tumor Biology and Cancer Research- Lima, Peru

SCIENTIFIC PRESENTATIONS:

- In silico presentation of a biosensor for the detection of resistance genes: iGEM UNALM Academy / United States – 2022
- Presentation of the work “Global analysis of microbial diversity and antibiotic resistance profiles in pristine and non-pristine hot springs” – ISCB Latin Symposium

WORK EXPERIENCE

PROFESSIONAL ACTIVITY

01/04/2023- 31/01/2024 | CLINICAL ASSISTANT POSITION – INTERNSHIP

Campoy Health Center / Integrated Health Networks Directorate Lima Centro

- Dengue vector control surveillance.
- Clinical laboratory activities: collection of blood samples for various analyses (complete blood count, glycated hemoglobin, immunology, biochemistry).

01/08/2024- 01/02/2025 | CLINICAL BACTERIOLOGY RESEARCH INTERN

Research Assistant Position – National Institute of Health (INS)

- Conducted clinical bacteriology cultures and isolation techniques to identify pathogen strains.
- Assisted in molecular biology assays, including PCR and gel electrophoresis, for diagnostic research.

11/08/2025- 31/12/2025 | MICROBIOLOGY AND IRRADIATION ASSISTANT

Clinical Assistant Position – Peruvian Institute of Nuclear Energy (IPEN)

- Support in microbiological activities, including sample preparation for irradiation.
- Operation and data recording in the Irradiation Laboratory.
- Research activities in the field of Molecular Biology, including PCR and Real-Time PCR, NGS, among other technique

RESEARCH ACTIVITIES

COMPLETED:

- Participation in the International iGEM Design Competition for the development of a biosensor for antimicrobial resistance detection. iGEM Academy / United States – 2022
- Quantification of pathogens and correlation with the relative abundance of resistance genes in chicken carcasses-Undergraduate thesis conducted at the Biochemistry and Molecular Biology Laboratory, Universidad Nacional Federico Villarreal/ Lima, Peru - 2024
- Standardization and validation of Multiplex Real-Time PCR for the detection of antimicrobial resistance genes - National Institute of Health/Lima, Peru -2024
- Bioinformatics Research Intern – International Laboratory for Human Genome Research (LIIGH-UNAM) / Queretaro, México - 2026

PUBLICATIONS AND SCIENTIFIC COMMUNICATIONS

- Remote presentation: “Global analysis of microbial diversity and antibiotic resistance profiles in pristine and non-pristine hot springs” – ISCB Latin Symposium.
- Remote presentation on the in silico development of a biosensor for resistance gene detection – iGEM Academy.
- Conference Abstract: Early Detection of Breast Cancer Through miRNAs Expression in Liquid Biopsy: Study in the Peruvian Population DOI: [10.1016/j.jlbb.2025.100424](https://doi.org/10.1016/j.jlbb.2025.100424)
- Scientific paper : Prospective Study of the Relative Abundance of Antimicrobial Resistance Genes in Escherichia coli O157:H7 Obtained from Chicken Carcasses from Local Markets in Lima, Peru. DOI: [10.3390/antibiotics15020191](https://doi.org/10.3390/antibiotics15020191)
- Scientific paper : Circulating Free miRNAs as Liquid Biopsy Biomarkers for Early Detection of Breast Cancer in Peruvian Women. DOI: [10.3390/cancers18121883](https://doi.org/10.3390/cancers18121883)

HONORS AND AWARDS

- Former Recipient of the Beca Permanencia Scholarship – Awarded for the academic years 2020–2024.
- Academic Excellence Diploma – Awarded during the fifth year for achieving 2nd place in the Biology program. - Top 10% of the graduating class in the Biology program.
- Awarded Competitive Research Funding – ProCiencia–CONCYTEC (2025)
